**i** We may make statements on this Web page regarding our product development and service offering initiatives, including the content of future product upgrades, updates or functionality in development. While such statements represent our current intentions, they may be modified, delayed or abandoned without prior notice and there is no assurance that such offering, upgrades, updates or functionality will become available unless and until they have been made generally available to our customers.

Known Issues are now reported directly on this page and updated regularly. The table below shows the known issues that appear in Release 4.1/6.1 Each identified issue includes the following information:

- **ID:** An ID internal to Blackboard Product Development's issue tracking software. The ID is shorthand that can be used when referring to a specific issue.
- **Affects Versions:** Lists the releases that are impacted by the issue. Note that this column may use build numbers, including some build numbers that are internal to Blackboard and not released to clients. Since build numbers are sequential, it can be presumed that an issue appearing in any build of the same release will appear in subsequent builds of that release.
- **Component:** Identifies the subsystem in which the issue appears.
- **Release Notes:** Describes the issue and its consequences.
- **Resolution:** Displays the status of the issue.
- **Target Release:** Identifies a prospective release that will include a fix for the issue. Target Release represents an anticipated future release that is subject to change at any time without notice. Please check the Resolved Issues for the appropriate application pack, service pack, or hotfix before upgrading to ensure that a particular issue is fixed in that release.
  - **Future Reference** denotes an issue that may be considered for an upcoming or future maintenance release. It may also be considered for a feature enhancement or product release. For instance, a number of Gradebook issues may be nulled by a new update to the Gradebook.
- **Created:** Displays the date that this issue was created.

**TIP:** To sort the list, click on the column header.

Key	Affects Version/s	Component/s	Release Note	Resolution	Target Release	Created
AS-111857	8.0.165.0	Administration (Learning System)	If an Observer's Primary Institution Role is set to a custom role, when the Observer changes passwords, the Primary Institution Role is changed to Observer. When this happens, any students that were being observed remain on the Observer Dashboard, but the Courses can no longer be accessed by the Observer until the primary institution role is changed back to its original designation.	UNRESOLVED	Future Reference	12/6/07 5:28
AS-108399	7.2.383.0 7.3.x 8.0.x	API (Learning System)	blackboard.platform.intl.LocaleManager should be included in the public APIs. In addition, the javadoc for getMasterLocale() should be added.	UNRESOLVED	Unknown	6/19/07 8:24
AS-108455	7.3.x 7.2.x 8.0.x	Assessments (Learning System)	After creating a pool with a Random Block question, attempting to add the one Random Block question by selecting All (1 question) to an Assessment causes an error.
