Let the main object of this, our Didactic, be as follows: To seek and to find a method of instruction, by which teachers may teach less, but learners learn more; by which schools may be the scene of less noise, aversion, and useless labour, but of more leisure, enjoyment, and solid progress...

---John Amos Comenius
The Great Didactic

Schools aren’t as good as they used to be, but then they never were.

---Will Rogers

This course has two purposes. The first is to introduce you to the most current and, from the viewpoint of educational research, the most effective teaching practices. In this sense, the course will be practical. The second and more important purpose is to explore the psychological assumptions implicit in these practices. The major outcome to be expected of this course is an ability and willingness to examine your own beliefs about teaching in light of established principles of learning and teaching.

Throughout the term we will discuss topics which are of immediate concern to teachers as well as of theoretical interest to researchers. In order to make the discussions more real to you, a field experience is built into the course. You will be placed in an elementary or secondary classroom as an assistant teacher for about four hours per week beginning the week of September 19 and ending the week of December 2. You must attend one of the two scheduled organizational meetings with the Department’s Field Coordinator to complete questionnaires and receive information about this field experience. **You cannot successfully complete the course without completing the forms at this informational meeting. The meetings will be held in Prosser Auditorium at 5:00 PM on August 31 and 11:45 AM on September 1.**

Although I will lecture occasionally, I prefer that most class sessions have a discussion format. I welcome questions and discussion of the material at any time, and encourage you to ask for clarification whenever you need it. Some of the material is difficult, and lectures are designed to clarify or illustrate principles and concepts. It is therefore important that the assigned material be read in advance of class.

Objectives:
- Students will understand the major constructs and principles of Piaget's theory of intellectual development and will apply these principles through the development of constructivist lesson plans.
- Students will understand the major constructs and principles inherent Gardner's theory of multiple intelligences and will apply these principles through the development of lesson plans consistent with Gardner's theory.
- Students will understand the major constructs and principles in a variety of theories of motivation and will apply these through the development of lesson plans consistent with a mastery goal orientation to teaching.
- Students will demonstrate an understanding of classroom management concepts and strategies.
ATTENDANCE POLICY

Attendance will be taken in class. Each unexcused absence will result in a reduction of the "attendance" portion of your final grade. Details are given in the section on course requirements.

Regular attendance at the field experience is essential. I am asking your cooperating teacher to provide you with a professional experience. This, in turn, requires a sense of professional responsibility from you. An unexcused absence will result in termination of the field experience and a failing grade in the course. If you must miss a scheduled session at your school due to illness, you must call your school and make sure that a message gets to your cooperating teacher and call Mrs. Modjadidi, our Field Coordinator, at 610-861-1473.

REQUIRED TEXTS

EVALUATION POLICY

Each assignment will be given a letter or numerical grade based on a 100 point scale, and will have the following weight when determining your final course grade:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes (Multiple Choice)</td>
<td>40%</td>
</tr>
<tr>
<td>Midterm Exam (Essay)</td>
<td>10%</td>
</tr>
<tr>
<td>Lesson Plans</td>
<td>15%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>10%</td>
</tr>
<tr>
<td>Field Analysis</td>
<td>10%</td>
</tr>
<tr>
<td>Coop's Evaluation</td>
<td>10%</td>
</tr>
<tr>
<td>Attendance/Participation</td>
<td>5%</td>
</tr>
</tbody>
</table>

The following grade conversions will be used in determining your recorded letter grade for the course:

<table>
<thead>
<tr>
<th>Numerical Grade</th>
<th>Letter Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>94 - 100</td>
<td>A</td>
</tr>
<tr>
<td>90 - 93</td>
<td>A-</td>
</tr>
<tr>
<td>87 - 89</td>
<td>B+</td>
</tr>
<tr>
<td>84 - 86</td>
<td>B</td>
</tr>
<tr>
<td>80 - 82</td>
<td>B-</td>
</tr>
<tr>
<td>77 - 79</td>
<td>C+</td>
</tr>
<tr>
<td>74 - 76</td>
<td>C</td>
</tr>
<tr>
<td>70 - 73</td>
<td>C-</td>
</tr>
<tr>
<td>67 - 69</td>
<td>D+</td>
</tr>
<tr>
<td>64 - 66</td>
<td>D</td>
</tr>
<tr>
<td>60 - 63</td>
<td>D-</td>
</tr>
<tr>
<td>0 - 59</td>
<td>F</td>
</tr>
</tbody>
</table>

COURSE REQUIREMENTS

Quizzes/ Exams
Five multiple choice quizzes will be given on or about the dates indicated on the reading/topic schedule. The midterm exam and the final exam will each consist of a mix of multiple choice and essay questions.

Field Analysis
Your field analysis is to be completed over the course of the field experience. This analysis is not intended to be just an anecdotal journal or log ("Today I conducted a spelling lesson..."), but rather a thoughtful discussion (in about 15 to 20 pages) of how concepts, principles and theories discussed in class relate to practical experience and observation. I will provide further details later in the semester.

Lesson Plans
Three formal lesson plans are due on the dates indicated in the reading/topic schedule. The plans can be at grade levels and in content areas of your choice. You must use the formal format attached to the end of this syllabus. The first plan must be written to conform with constructivist principles, the second from a multiple intelligences perspective, and the third to conform with the TARGET model. Each lesson plan must have attached a one page explanation of how the plan satisfies the principles or elements of the perspective from which it was written. A description of the requirements of each plan is attached to the end of the syllabus.
**Field Experience Evaluation**
Your cooperating teacher's evaluation of your performance in your field experience will be calculated into your final grade. **However, an unexcused absence from the field experience will result in termination of the experience and a grade of F for the course.** The evaluation will be placed on file for consideration by the Teacher Education Committee if you apply to the teacher certification program.

**Class Attendance/Participation**
Class discussion of the material can be important to a fuller understanding of course content. It is therefore important that you complete the assigned readings on time and that you participate in class discussions. Attendance will be considered when calculating your final grade. Each unexcused absence will lower your attendance and participation grade by the equivalent of one grade. One unexcused absence, for example, will result in an attendance grade of B, two unexcused absences gives an attendance grade of C, three a D, etc.

**POLICY ON ACADEMIC HONESTY**
Recognized standards of honesty are part of the foundation on which the integrity of an academic community rests. Accordingly, the Moravian College Faculty in 1986 adopted a statement on academic honesty, the standards of which will be strictly applied in this course. You are encouraged to read carefully the description of this policy which is printed in your Student Handbook. If you are unsure about the propriety of a given procedure or approach for completing assigned work in this course, please consult with me before completing the assignment. **Any breach of the College's honesty code will constitute grounds for the assignment of a failing grade in the course.**
**Constructivist elements of this lesson:**

**Active Involvement:**
Students will be actively involved in this lesson by analyzing sample political cartoons, creating their own cartoons, and presenting their cartoons for analysis and discussion to the class.

**Reflective Abstraction:**
The process of reflective abstraction is a process of moving from a lower to higher level of intellectual organization. This lesson requires students to do just this by having them analyze the critical elements of sample cartoons and then demonstrate their understanding of these elements in the creation of their own cartoon.

**Cognitive Conflict:**
Cognitive conflict is inherent in this lesson because students are required to identify, discuss, and symbolically represent a current event in an alternative representational form.

**Social Interaction:**
Students will analyze cartoons in small groups and then will present their own cartoons to the class for explanation, analysis and discussion.

**Intellectual Autonomy:**
Students choose the current events they will represent in cartoon form and then will create their own cartoon.
Lesson Plan 2: Multiple Intelligences

When developing your lesson plan consistent with a multiple intelligences approach, consider the quote on pages 172 and 173 of the Gardner book:

*It makes sense to think of human cognitive competence as an emerging capacity, one likely to be manifest at the intersection of three different constituents: the “individual,” with his or her skills, knowledge, and aims; the structure of a “domain of knowledge,” within which these skills can be aroused; and a set of institutions and roles -- a surrounding “field” -- which judges when a particular performance is acceptable and when it fails to meet specifications. The acquisition and transmission of knowledge depends upon a dynamic that sustains itself among these three components.*

Append to your lesson plan a justification which explains how the plan addresses each of these three components:

- The individual: How does the plan accommodate different intellectual profiles?
- The domain: Where do the skills and knowledges being taught fit within the larger domain or discipline?
- The surrounding field: How does your plan make the skills and knowledges being taught “authentic” or “relevant” from the perspective the real world? Does your plan contain an assessment strategy which has “ecological validity?” (See page 175).

Lesson Plan 3: The TARGET Model*

When writing your lesson plan consistent with the TARGET model, append to your lesson plan a justification which explains how the plan addresses each component of the TARGET model:

**T:** Arrange Task Structure to provide challenges to both faster and slower learners. Individualize tasks so that all students can experience success through reasonable effort.

**A:** Arrange the Authority Structure to share control with students and to allow some autonomy.

**R:** Arrange the Reward Structure in such a way that students receive informational feedback on their performance.

**G:** Build an environment of acceptance and appreciation through appropriate grouping.

**E:** Adopt evaluation practices which avoid social comparison.

**T:** Allow the time needed for student involvement in learning tasks.

*Adapted from the research of Carol Ames & Joyce Epstein.*
