In this course you will be continuing your study of the mathematics of infinite processes. We will study advanced integration, elementary differential equations, and infinite sequences and series. You should gain

- a mastery over basic techniques of integration
- deeper insight into the power of calculus as a tool for modeling real world situations
- further expertise in using Maple as a tool for problem solving

The main content of the course is contained in Chapters 5–11 of the text.

Course Description
The course meets MWF from 11:25 to 12:30 p.m. in PPHAC 101 on MW and PPHAC 112 on F. Homework assignments will be given at each class meeting. Students are expected to complete these assignments by the next class meeting, where they will be discussed. No one can learn mathematics without doing it themselves and so, to the student, homework is the most important part of the course. Since class participation is important, students are expected to attend every class.

Grading
Your final grade will be based on weekly quizzes (75-100 points), Maple projects (about 100 points), 3 hourly exams (100 points each), and a comprehensive final exam (150-200 points). Exams may be in-class, take-home, or a combination of the two.

Attendance
Class attendance is required. You are responsible for all work covered in class and all assignments, even if absent from class. If you must miss more than one class due to illness or emergency, you should notify the instructor. In-class exams must be taken at the announced time; make-up exams will be given only in case of extreme emergency or serious illness.

ACADEMIC HONESTY POLICY GUIDELINES
MATHEMATICS COURSES
The Mathematics and Computer Science Department supports and is governed by the Academic Honesty Policy of Moravian College as stated in the Moravian College Student Handbook (pp. 52-57). The following statements will help clarify the policies of members of the Mathematics faculty.

In all homework assignments which are to be graded, you may use your class notes and any books or library sources. When you use the ideas or thoughts of others, however, you must acknowledge the source. For graded homework assignments, you may not use a solution manual or the help, orally or in written form, of an individual other than your instructor. If you receive help from anyone other than your instructor or if you fail to reference your sources you will be violating the Academic Honesty Policy of Moravian College. For homework which is not to be graded, if you choose, you may work with your fellow students. You are responsible for understanding and being able to explain the solution of all assigned problems, both graded and ungraded.
