**Required Reference:**

This reference is essential in preparing all written assignments for this course, and should be helpful in preparing assignments for other courses as well.

**Research Guidelines**

It is important that classroom and textbook learning are augmented by literature, data and information that has been obtained or developed by credible, quality outside (in the field or from the "academy") sources.

The Internet is an excellent tool for identifying and acquiring research effectively and efficiently. It can save time and connect you with quality sources of literature and information. However, websites sponsored by organizations or individuals normally have little credibility or value in providing literature or information about anything other than the sponsoring individual or organization. The exception is if the website contains data from professional research studies or projects sponsored by the website owner, in which case it will be clear that the information is research rather than opinion or propaganda.

All research that students do needs to be cited according to the 2001 (5th edition) of the APA Publication Manual.

The research you consult should be listed as citations for References. Unlike citations for Bibliographies that may permit all consulted sources, References include only those sources you have actually used. Citations are listed in a References list at the end of a written work or paper in alphabetical order, with the second line of text indented. Citations listed in the text of your work are listed as (last name and year) e.g. (Smith, 2005) or last name (year) e.g. Ramirez (2005).

**Course Expectations**

**Readings**
Students will be responsible for preparing the assigned Reading(s) for each class. Assigned readings are indicated in the "Assignment" column of the Course Schedule. Students should be prepared to discuss Readings on the date listed for that particular topic.

**Total Quality Participation**
Students are expected to attend all class sessions and participate in class discussions. Participation quality is measured by a student's classroom activity (e.g. responsiveness to questions) and initiative (e.g. preparing additional reading and sharing this with the class).
Students begin the semester with the maximum points possible for Quality Participation. Attendance will be taken and absences recorded. Points will be deducted for each session a student does not attend and does not have an Excused Absences (an illness, a medical or family emergency; a scheduled athletic game/match, a professional obligation). Students are not penalized for Excused Absences which are approved by the Instructor and accompanied by appropriate documentation. Each semester, students are permitted one free pass (absence from class without excuse and for any reason). A free pass may not be used during a class session in which an exam is given, any group presentation is being made or any scheduled class session held on the last class day before a holiday or break (e.g. Tuesday before Thanksgiving, Thursday or Friday before Spring Break, etc.).

In any case, a student should inform the Instructor of anticipated absences in advance (whenever possible) so that it can be determined if an absence will be excused. A student using a free pass should inform the instructor before or after the absence. Also, a student who misses a class session for any reason is responsible for preparing readings, obtaining discussion notes and handouts and completing and submitting (on time) assignments for the session missed.

**Managing a Marabella Course**

**For Class:**
- Always notify the Instructor in advance if you will be absent from class (if advance notice is not feasible, as soon as possible).
- Ask the Instructor, rather than assume, if anything in class or in this syllabus is unclear.

**For Written Assignments:**
- Do not use title pages or fancy covers.
- Always number pages, beginning with page two.
- Type section headings as described in the syllabus.
- Staple pages. Do not use paper clips.

Develop a 4MM Question - a research question that narrows the general topic and gives a specific focus to your presentation. Questions must be approved by the professor prior at least one week prior to the date of your presentation.

Prepare a 2 to 3 page, typewritten research paper (in outline format) and a 4 minute maximum (you will be timed!) oral presentation. The presentation and written outline should be organized according to the following format, and the written outline should also contain the headings listed below:

Summary (20% of the paper's content) - present a synopsis of the information presented in the articles; this is not a summary of each individual article, but rather a summary of the content of all the articles together; it may include what content is similar, different or surprising among the articles you read
Reaction (40% of the paper's content) - discuss what you think about what the articles stated; the key point here is to give your opinion, perspective and/or viewpoint about the content and information you researched.

Application (40% of the paper's content) - suggest how you might apply what you have learned to a familiar situation; in this part of the presentation, show how you have or would use the learning in situations related to school, work or community activities in which you are involved.

Date of Presentation
Your presentation will be submitted to the Instructor and the Class on the date this particular topic is to be discussed in class.

The research you consult should be listed as citations for References described in the Course Information section of this course website.

Number all pages after page 1.
