COURSE DESCRIPTION

This course is designed to provide the student with a fundamental understanding of individual and business taxation. Topics include tax planning as it relates to individuals and business entities, tax implications of various types of businesses, and the use of investments, employee compensation, retirement plans, etc. as tax planning tools. The course will consist of lectures and short reading and writing assignments, and a project.

COURSE OBJECTIVES

At the completion of this course, the student will be able to:

1. Comprehend the basic principles of individual and business taxation
2. Be aware of the role taxes play in financial and managerial decision making and should understand how taxes motivate people and institutions to engage in certain transactions and activities.
3. Understand the fundamentals of basic tax planning
